Professional Summary

Computer Science Engineering student at **K L University**, graduating in 2027 with a specialization in **Artificial Intelligence and Visual Intelligence** and GPA of **8.56/10**. Aspiring Full-Stack Developer with hands-on experience in the **MERN stack, React.js, Node.js, Express.js, MongoDB, MySQL, REST APIs, JavaScript, TypeScript, authentication, CRUD operations, and deployment workflows**. Experienced in developing responsive, database-driven web applications with a strong interest in scalable software development and modern web technologies.

Education

K L University , Hyderabad, India	2023–2027
B.Tech in Computer Science Engineering – AI & Visual Intelligence	GPA: 8.56/10
Narayana Junior College , Hyderabad, India	2021–2023
Intermediate (Class XII)	GPA: 8.21
Sri Chaitanya Techno School , Hyderabad, India	2019–2021
High School (Class X)	GPA: 10.0

Technical Skills

Languages: JavaScript, TypeScript, Java, Python
Frontend: React.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, MySQL, SQL
Tools: Git, GitHub, Postman, Render, Linux, VS Code
Concepts: Full-Stack Development, MERN Stack, CRUD Operations, Authentication, RESTful APIs, Database Design, Deployment, Debugging, DBMS, OOP, Data Structures and Algorithms

Work Experience

Tech Mahindra	Hyderabad, India
<i>Software Development Intern</i>	<i>May 2026 – Sep 2026</i>

Product Inventory Management System	<i>Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Angular, TypeScript</i>	GitHub
- Developed a full-stack Product Inventory Management System using Java, Spring Boot, Angular, and MySQL to manage product records through end-to-end CRUD operations. - Implemented RESTful APIs with Spring Boot, Spring Data JPA, and Hibernate for product creation, retrieval, updating, deletion, search, category filtering, and pagination. - Built a responsive Angular frontend with TypeScript and Bootstrap, integrating product management, input validation, search, filtering, and paginated views. - Integrated MySQL for persistent product data management and used Swagger UI and Postman for API documentation and testing.		

Insurance Product Inventory Management System	<i>Angular, TypeScript, Spring Boot, MySQL, REST APIs</i>	GitHub
--	---	--------

- Developed a modular insurance product management platform with Angular and TypeScript covering product catalog, product lifecycle workflow, categories, product managers, analytics, profile, and authentication modules.
- Implemented product CRUD operations with search, category and status filtering, and lifecycle tracking across Draft, Under Review, Approved, and Published states.
- Built reusable Angular components, services, routing, forms, and dashboard modules, with LocalStorage-based data persistence during the frontend development phase.
- Designed the application architecture for Spring Boot REST APIs and MySQL integration, with an AI Assistant interface for insurance product information and application support.

Pratinik Infotech	Pune, India
<i>Software Development Intern</i>	<i>Jun 2025 – Aug 2025</i>

- Built a **Student Grade Management System** using Java and JDBC with CRUD functionality for academic record management.
- Designed a **normalized database schema** and optimized query logic for efficient academic record management.
- Delivered the complete application within an **8-week internship** timeline while meeting all functional requirements.

Projects

Smart Artisan Assistant	<i>MERN Stack</i>
--------------------------------	-------------------

- Developed a scalable full-stack web application for artisans with modules including AI advisory, government schemes, production tracking, payments, and document management.
- Built responsive React dashboards displaying product, production, and earnings analytics.
- Designed and implemented RESTful APIs using Node.js and Express.js for users, products, payments, and uploaded documents.
- Integrated MongoDB for data storage and implemented real-time updates using Socket.IO with secure file uploads using Multer.
- Deployed frontend and backend applications using Render and managed source code using GitHub.

Daily Expense Tracker

React.js, TypeScript, Tailwind CSS, REST APIs

- Developed a full-stack expense management application with user authentication, expense categorization, dashboard analytics, and responsive UI components.
- Integrated Chart.js for spending visualization and implemented REST API synchronization, form validation, and multi-user expense tracking.

URL Shortener Application

MERN Stack

- Developed a full-stack URL shortener using MongoDB, Express.js, React.js, and Node.js.
- Designed backend APIs for generating, storing, retrieving, and redirecting shortened URLs.
- Implemented CRUD operations, routing, database management, and debugging workflows.
