Professional Summary

Computer Science Engineering student at **K L University**, graduating in 2027 with a specialization in **Artificial Intelligence and Visual Intelligence** and GPA of **8.56/10**. Aspiring Software Developer with hands-on experience in **Core Java, Object-Oriented Programming, Data Structures and Algorithms, JDBC, SQL, REST APIs, MySQL, and full-stack development**. Strong foundation in backend development, database management, problem solving, and application design.

Education

K L University , Hyderabad, India	2023–2027
B.Tech in Computer Science Engineering – AI & Visual Intelligence	GPA: 8.56/10
Narayana Junior College , Hyderabad, India	2021–2023
Intermediate (Class XII)	GPA: 8.21
Sri Chaitanya Techno School , Hyderabad, India	2019–2021
High School (Class X)	GPA: 10.0

Technical Skills

Languages: Java, Python, C, JavaScript, TypeScript
Core Java: Object-Oriented Programming, Data Structures & Algorithms, Exception Handling, Collections
Backend: JDBC, REST APIs, Node.js
Web: HTML, CSS, React.js
Database: SQL, MySQL
Tools: Git, GitHub, VS Code
Concepts: DBMS, Full-Stack Development, Database Design, CRUD Operations, Problem Solving

Work Experience

Tech Mahindra	Hyderabad, India
<i>Software Development Intern</i>	<i>May 2026 – Sep 2026</i>
Product Inventory Management System	<i>Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Angular, TypeScript GitHub</i>
- Developed a full-stack Product Inventory Management System using Java, Spring Boot, Angular, and MySQL to manage product records through end-to-end CRUD operations. - Implemented RESTful APIs with Spring Boot, Spring Data JPA, and Hibernate for product creation, retrieval, updating, deletion, search, category filtering, and pagination. - Built a responsive Angular frontend with TypeScript and Bootstrap, integrating product management, input validation, search, filtering, and paginated views. - Integrated MySQL for persistent product data management and used Swagger UI and Postman for API documentation and testing.	
Insurance Product Inventory Management System	<i>Angular, TypeScript, Spring Boot, MySQL, REST APIs GitHub</i>
- Developed a modular insurance product management platform with Angular and TypeScript covering product catalog, product lifecycle workflow, categories, product managers, analytics, profile, and authentication modules. - Implemented product CRUD operations with search, category and status filtering, and lifecycle tracking across Draft, Under Review, Approved, and Published states. - Built reusable Angular components, services, routing, forms, and dashboard modules, with LocalStorage-based data persistence during the frontend development phase. - Designed the application architecture for Spring Boot REST APIs and MySQL integration, with an AI Assistant interface for insurance product information and application support.	
Java Developer Intern – Pratinik Infotech	Pune, India
<i>Jun 2025 – Aug 2025</i>	
- Built a Student Grade Management System using Java and JDBC with complete CRUD operations for academic record management. - Designed a normalized MySQL database schema and optimized query logic for efficient student record retrieval. - Applied Object-Oriented Programming and database connectivity concepts to develop a reliable backend application. - Delivered the complete application within an 8-week internship while meeting functional requirements.	

Projects

Inventory Management System

Java, React.js, Node.js, MySQL, REST APIs

- Developed a full-stack inventory management platform with product management, inventory tracking, cart functionality, and role-based access.
- Implemented CRUD operations, REST APIs, and MySQL database integration for efficient data management.
- Applied Object-Oriented Programming and modular design practices to improve maintainability and scalability.

Daily Expense Tracker

React.js, TypeScript, REST APIs

- Developed a full-stack expense management application with authentication, expense categorization, dashboard analytics, and responsive UI.
- Integrated REST APIs, Chart.js visualization, form validation, and multi-user expense tracking.

Student Grade Management System

Java, JDBC, MySQL

- Developed a database-driven Java application supporting CRUD operations and academic record management using JDBC and MySQL.
